You'll see in the figure above that it is impossible to zoom to 100% from the 'Rating & Comments' panel as there are no zooming buttons. Other than the issue with zooming, you can see that the third image in the figure above has been flattened in Lightroom as compared to Photoshop's original version in the figure above. Focusing is now improved in Bridge and Photoshop. You can now focus objects such as logos in a group by selecting them and pressing the keyboard shortcut, Ctrl/Command + I. You can use the shift key to rapidly dial between groups of people. You can now add metadata to a selection (Record, Edit, Delete key, assign to layer, downloadable sheet) and toggle it on and off via the small right-cursor button above the shortcut key. You can now set the exposure level members of your Photoshop Layers panel by pressing Command-Option-+, or by clicking the level meter and clicking the eyedropper icons. You can display the layer board anywhere (not just directly over a selected object). The new Develop Module has many new features including: a new Curve Editor that includes the new Bezier Curve controls, a Curve Interpolation dialog box that lets you know what part of a curve you are on, and a new Analyze tab that gives information about an image's exposure value, sharpness, focus, and color. The file format for Lightroom 4 and earlier has always been named ".rtf." In the new Lightroom version, the ".lrf" file format is also named for a file extension - the extension has no indication of what it actually is.

Surprisingly, some users have reported that Adobe Photoshop Elements won't install on Macs running macOS Sierra. It should be noted, however, that this is very rare and things could be very different for existing Mac users. If you are one of those users, the best solution to this problem is to uninstall the previous version of Photoshop and then disable the Adobe Photoshop Elements repository before installing the new release. Other users have reported that the latest release of Photoshop Elements fails to install, and to fix the problem, go to Software Update on your Mac, which should then prompt you to download Photoshop Elements from the App Store.
