There are many books on the market concerning the main books in the Neurosciences to be used as a resource for the teaching of these subjects but they are neither gathered nor updated. Please try to understand that it is not our intention to compete against the established catalogs but only to create an important bibliography with the definitive list of Neurosciences books sorted by topics and authors. Also, should the financial situation permit us, we will upgrade the catalog soon and we will keep the list updated. Among the books that are not included in the catalog, we will note the more important for us, are the books we could consider good references but we will not give it so big rank. This is not a cataloging and indexing service. We are not responsible for the quality of the books cited. We have taken as example from the Anatomy and Physiology textbook published by Pearson Education, the books cited in each chapter of the textbook are: Cog. Cog. Fungi,. Anat. Neurophys. Pines, D. Neuros. 10.1007/978-3-642-85351-3_10. Cog. Cog. Fungi. - Dignat, F., R. Prasad, L. Medero, P. Lozano, B. C. Elsevar, A. Carmona, V. J. Garcia, R. M. Valenzuela and A. Galan. 1996.
